High end tabletop dock for all iPad mini, iPad Air and iPad Pro models

Adjustable Lightning Connector

Power supply included 110-240V to POE+

Audio output (analog stereo, 3.5mm)

Made of Glass und Aluminum

Available in black or white

Made in Austria

iRoom's iTop without Buttons is an elegant and convenient tabletop iPad charging station. It allows the user to take out the iPad and use it as a mobile device. Thanks to its adjustable lightning connector, iTop accommodates all actual iPad models, even the iPad mini.

iTop blends perfectly into any interior design and matches Apple's iPad design in color, form factor and materials. iTop's base is a milled piece of aluminum, heavy enough to not slide away when the iPad is being operated. iTop is available with black or white faceplate, it stores and charges the iPad and can be powered through PoE+.

Wherever iTop is used at home or in corporate meeting rooms, it's an eye-catcher and allows for convenient one-handed operation of the iPad.

Designed and built in Austria, the quality and fit & finish is appropriate for luxury spaces.
